AI Memory

Doc Scan

AE

UAE Bilingual

Expenses

Travel Plans

Weather

One WhatsApp number. Zero new apps. Everything handled.

India has AI access, but not AI habit

The assistant market is fragmented across apps, languages and workflows. WhatsApp is the missing distribution layer.

App fatigue

Users juggle 15+ apps. Every new AI product adds download, login and onboarding friction.

Memory gap

Assistants don't remember users across reminders, notes, bills, travel and expenses.

Language barrier

Most AI tools are English-first while India is voice-first and multilingual.

Workflow fragmentation

Reminders, notes, bills, expenses, news and tasks live in different tools with no single memory.

Trust + UPI gap

Indian consumers need UPI-native utility, not generic chatbot responses.

No daily AI habit

Most assistants are impressive demos, not everyday operating systems.

The winner will be the assistant that becomes a daily habit — not the smartest standalone app.

AI inside the app Indians already use

AskGogo turns WhatsApp into a personal OS for reminders, notes, tasks, bills and daily intelligence.

01

Save the number

No signup. Users start chatting instantly.

02

Ask naturally

Text or voice in any Indian language.

03

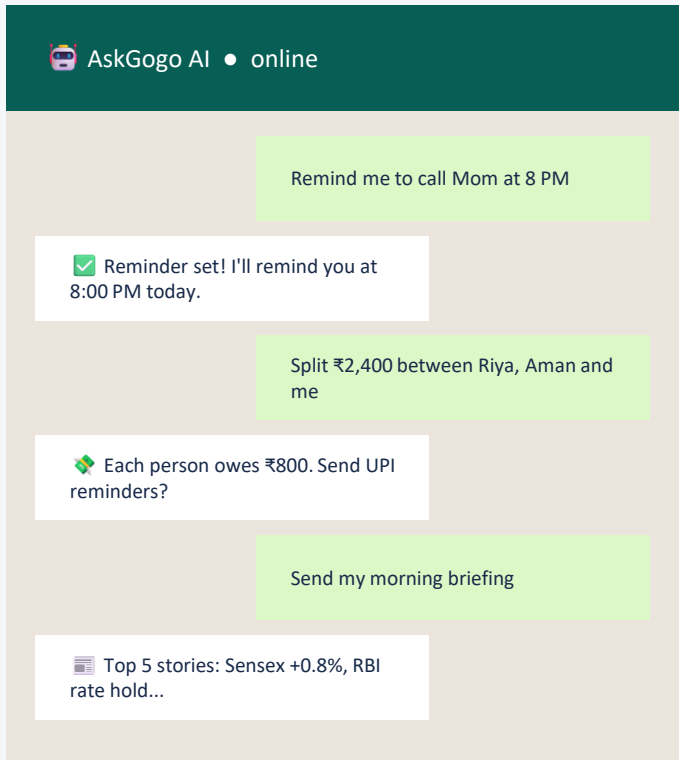

Memory graph

Gogo remembers context, preferences and habits.

04

Action layer

Reminders, notes, bill split, follow-ups, news.

12 superpowers inside one WhatsApp chat

Daily utility first. Memory as the long-term moat. UAE expansion adds bilingual & AED support.

Reminders

Recurring, contextual, natural language. Kal 8 baje remind karo.

Notes & Memory

Save, search and recall personal notes, tasks and context.

Bill Split

Group expenses with UPI-ready split prompts in rupees or AED.

Daily Tasks

To-dos, priorities, follow-ups and daily plan with morning briefing.

News Briefing

Personalized 5-point morning briefing. India + UAE editions.

Voice Notes

Speak in Hindi, Tamil, Kannada, Telugu, Marathi or English.

Travel Plans

Plan, store and get travel reminders. Flights, hotels, itineraries.

Doc Intelligence

Send any PDF or image — get instant summary, bill read, contract scan.

Expense Tracking

Log and categorize expenses. Monthly budget dashboard in chat.

Weather & Local

Bengaluru, Mumbai, Dubai, Abu Dhabi — weather, air quality, prayer times.

AE

UAE Bilingual Mode

Arabic/English bilingual support. AED currency. Local UAE features.

AI Memory Graph

Cross-conversation context. Gogo remembers who you are over time.

Built for how Indians actually, use WhatsApp

Voice notes, mixed languages and simple commands — no prompt engineering needed.

20.23%

Market CAGR

850M

Indians online

Why now

- WhatsApp is the default communication OS
- UPI made digital payments a daily habit
- LLM costs are falling rapidly
- Indian language internet is expanding
- No dominant consumer AI assistant yet
- UAE NRI population = premium market opportunity

Market position

AskGogo does not need to create a new category or a new user habit. It rides on WhatsApp behavior and converts it into daily AI utility.

Large market. Familiar interface. Daily use case. Low-friction conversion.

Memory + Distribution + India Localization

Every new user makes the product smarter, stickier and harder to replace.

Memory Graph

Persistent personal context across reminders, notes, bills, tasks and daily briefing.

Zero-Friction Distribution

No app. No login. Users start with one WhatsApp message.

AskGogo AI

WhatsApp-native AI OS

India Language Stack

Voice-first support for Hindi, Hinglish and 8+ Indian regional language flows.

Network Loops

Bill split, shared lists, family tasks and referrals create product-led growth.

Consumer-first, WhatsApp-native and India-priced

AskGogo combines personal AI, memory, Indian languages and UPI-native workflows at a consumer price point.

Feature	AskGogo	Memorae	Zapia	WATI	ChatMaxima
Target	Consumer	Consumer	Consumer	B2B	B2B
Platform	WhatsApp	App/Web	App	Dashboard	Dashboard
Memory	Graph-based	Basic	None	None	Basic
India languages	90+	2	3	5	4
UPI/Bill split	Yes ✓	No	No	No	No
Monthly price	₹149	₹400+	₹300+	\$59+	\$49+

AskGogo is priced for India, distributed through WhatsApp and designed for daily consumer utility.

High margin from day-one architecture

Lightweight AI/SaaS model. Shared Nexus AI infrastructure. WhatsApp-first distribution.

Viral utility before paid conversion

The GTM wedge: try it free → daily habit → subscribe → refer others.

Founder-led launch

WhatsApp demos, LinkedIn, Product Hunt and early beta users.

Viral use cases

Bill split, shared reminders, family tasks and voice notes drive organic sharing.

Subscription conversion

₹99 entry plan and Pro/Founder Pro upgrades. UAE plan at ₹450/mo.

Institutions + teams

Pilots for hostels, colleges, communities, SMEs and small teams.

The first 1,000 users prove habit. The next 10,000 prove monetization. The next 100,000 prove platform.
