Seed Round: INR 1.5 Crores (~\$180K)

The problem: investors own mutual funds, but not clarity

A massive Indian mutual-fund market still runs on unreadable statements, manual spreadsheets and shallow dashboards.

Unreadable CAS statements

Complex PDF statements from CAMS/KFintech make portfolio intelligence difficult for everyday investors.

No AI intelligence

Most dashboards summarize NAV and returns; they do not explain fund quality, overlap, risk or action.

Hidden costs everywhere

Expense ratios, exit loads, tax impact and duplication silently reduce long-term outcomes.

Fragmented ownership

SIPs, demat holdings, direct plans, regular plans and family portfolios remain scattered.

No personalized next step

Investors get generic advice instead of action: hold, switch, rebalance, harvest or continue SIPs.

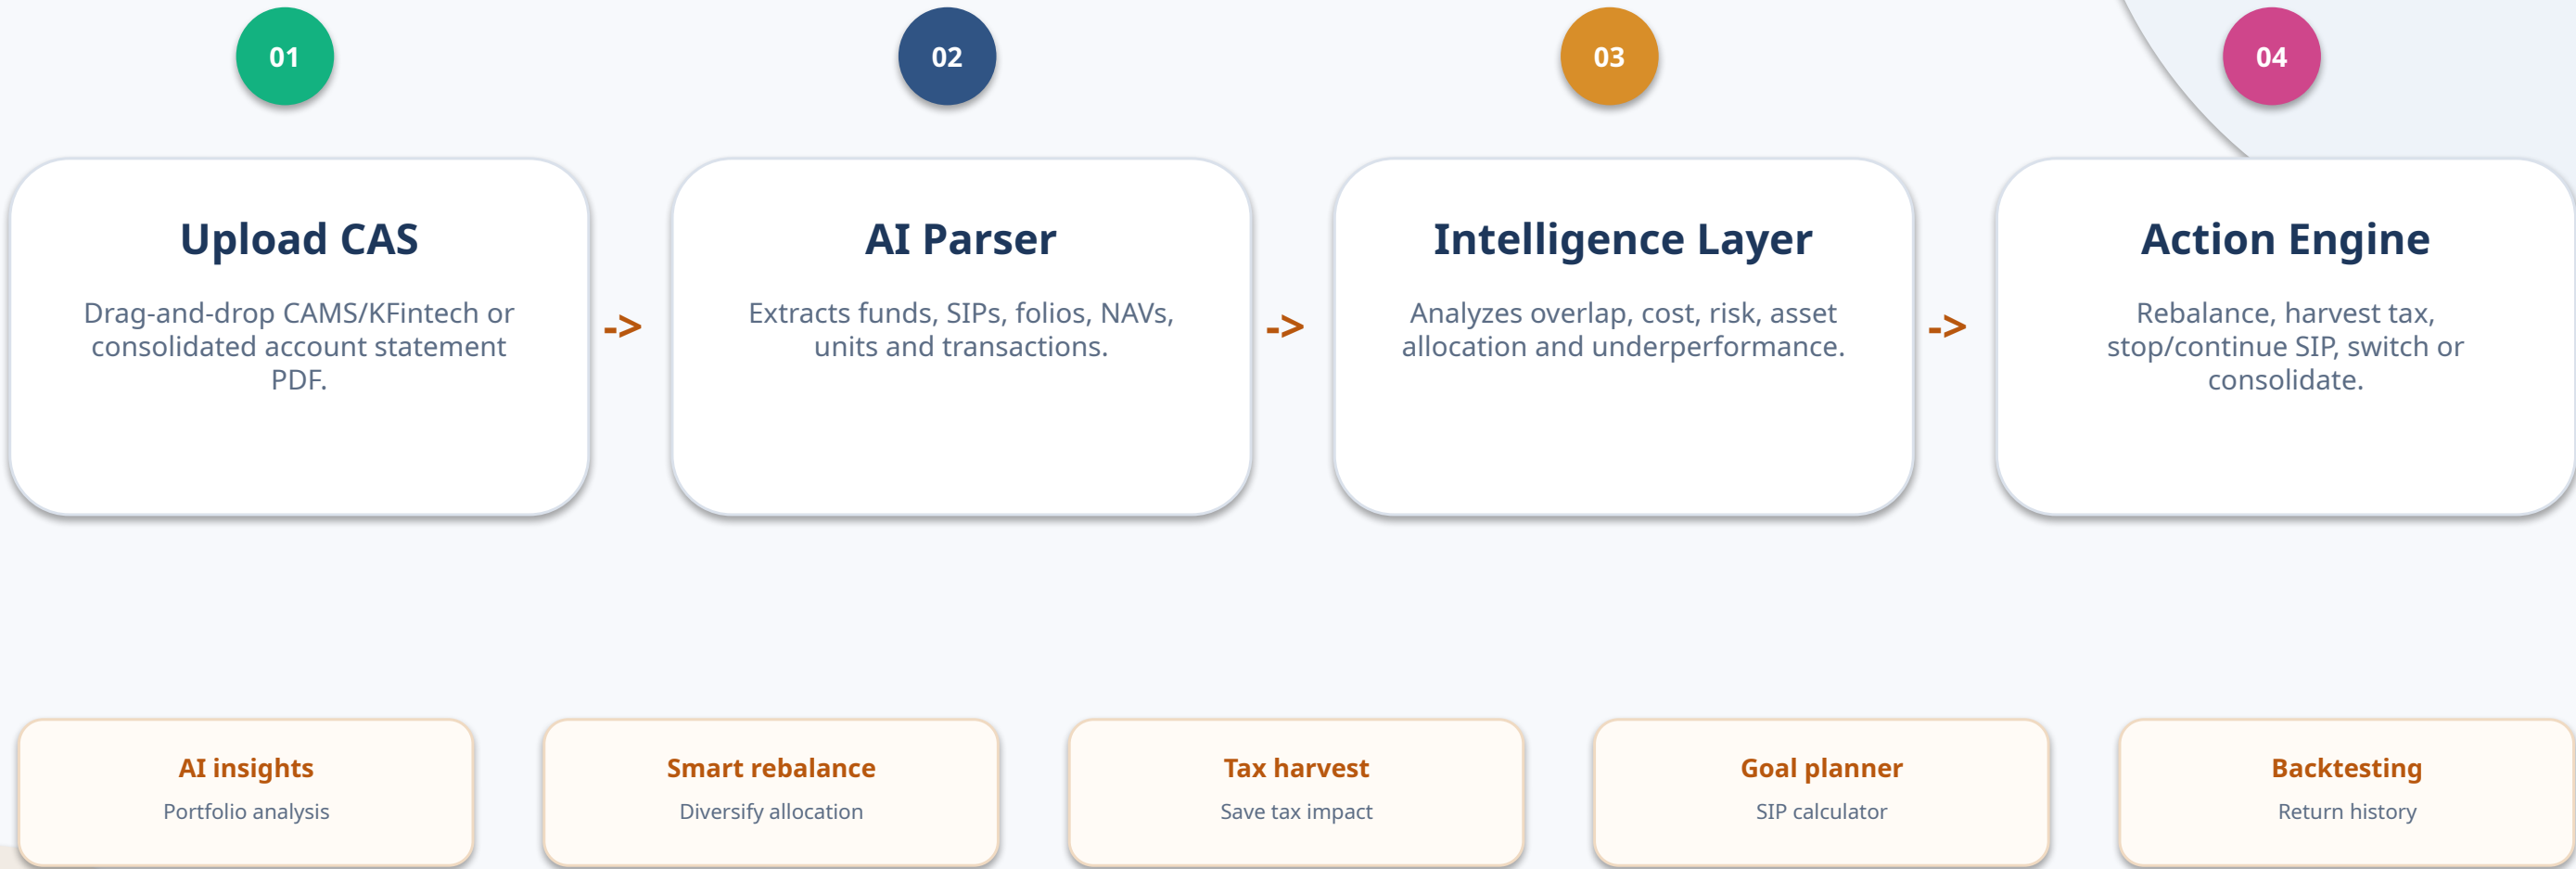

DIY investors are underserved

Mass-affluent users want portfolio clarity without paying a full-time advisor.

The biggest risk is not market volatility - it is not knowing what you own.

The solution: one upload, complete intelligence

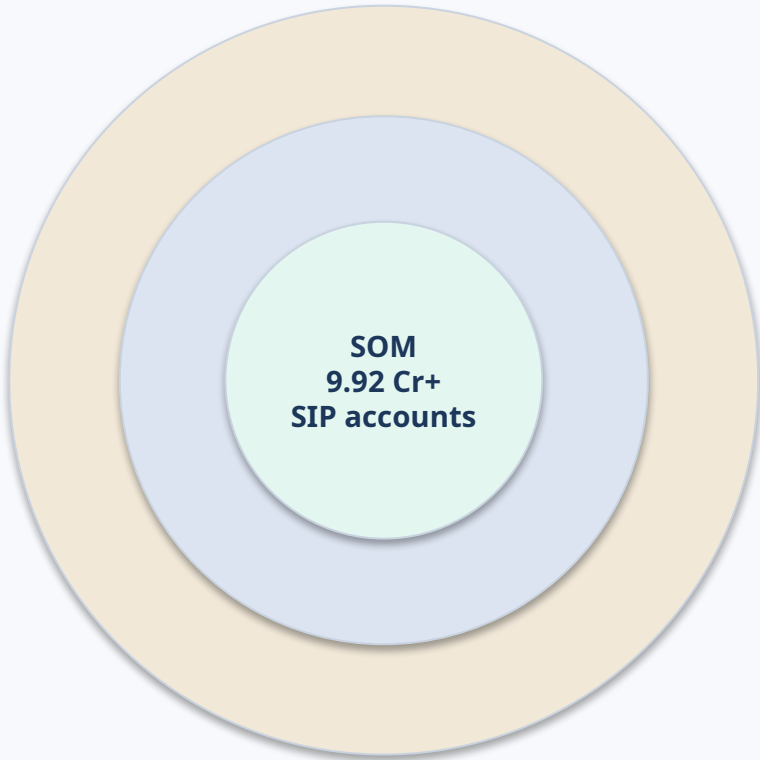

FolioIQ converts a CAS statement into portfolio insight, explainable AI actions and investor-ready recommendations.

Works with any CAS format. Built for transparency, India-ready compliance and investor trust.

Market opportunity: a 73.73 lakh crore AUM intelligence gap

Mutual funds are mainstream. Portfolio intelligence is still early.

Growth drivers

- 32,087 Cr** Monthly SIP inflows at scale
- 59 months** Consecutive SIP growth
- 40%** B30 city share by 2030 expected
- 1.50L Cr** Projected AUM by 2030
- 24,113** Average SIP ticket rising steadily

FolioIQ sits at the intelligence layer above AMCs, distributors, advisors and DIY investing.

Product modules: from statement to action

FolioIQ can start with CAS analysis and expand into a personal wealth intelligence operating system.

CAS Intelligence

Upload any CAS, extract holdings and generate a clean portfolio summary.

Fund Explorer

Search and compare funds by category, returns, volatility and expense ratios.

SIP Calculator

Model SIP growth, goal timelines and corpus creation scenarios.

AI Chat

Ask questions about your own portfolio in simple language.

Tax & Cost Engine

Identify exit load, expense-ratio drag and tax-harvesting opportunities.

Rebalancing Coach

Detect overlap, concentration and allocation drift with clear action steps.

The product wedge is upload-based intelligence. The long-term opportunity is an AI advisor layer for mass-affluent India.

Unit economics: profitable at 10,000 users

A lightweight AI/SaaS model with strong margin potential and low infrastructure burden.

Pricing tiers

Free	CAS analysis + basic dashboard
Pro	INR 199/mo - AI insights + rebalancing + tax harvest
Premium	INR 349/mo - goal planning, family portfolio and advisor-ready reports
Enterprise	B2B wealth platforms, RIAs, fintechs and banks

Competitive moat: four layers of defensibility

FolioIQ becomes harder to replicate as data, behavior and compliance workflows compound.

Why competitors cannot easily catch up: parsing accuracy, personalized AI actions, compliance workflows and accumulated behavior data.

Gross margin	82%
CAC at scale	INR 200

Comparable valuations: Groww, INDmoney and Kuvera validate the opportunity for consumer wealth intelligence.

Why now: five trends make this the perfect moment

A convergence of regulation, digital investing and AI readiness creates a once-in-a-decade opening.

01

SEBI 2026 regulations

New rules create transparency and compliance tailwinds for portfolio tools.

FolioIQ wedge

02

SIP boom

Monthly SIP accounts and contributions are scaling with retail participation.

FolioIQ wedge

03

B30 expansion

Beyond top cities, new investor growth needs simple intelligence layers.

FolioIQ wedge

04

AI maturity

LLMs can explain portfolio problems in simple language.

FolioIQ wedge

05

Zero competition

No default AI-powered mutual fund analytics platform owns this layer.

FolioIQ wedge

These trends converge to create a once-in-a-decade opportunity for AI-powered MF analytics.

Go-to-market: build trust, then scale distribution

FolioIQ can grow through free CAS analysis, content-led acquisition and B2B wealth partnerships.

1

Phase 1: Free intelligence wedge

Launch free CAS upload, portfolio health score and shareable summary to build trust and organic traffic.

Low CAC -> High trust -> Subscription/B2B scale

2

Phase 2: Pro subscription

Convert power users into Pro for AI chat, rebalancing, tax optimization and goal planning.

Low CAC -> High trust -> Subscription/B2B scale

3

Phase 3: B2B distribution

Partner with RIAs, wealth-tech apps, HR benefits platforms and banks as a white-label intelligence layer.

Low CAC -> High trust -> Subscription/B2B scale

The product has a natural habit loop: monthly SIPs, quarterly reviews, tax season and yearly rebalancing.
